Practice School - II

Final Presentation

Aryan Uday Kulkarni

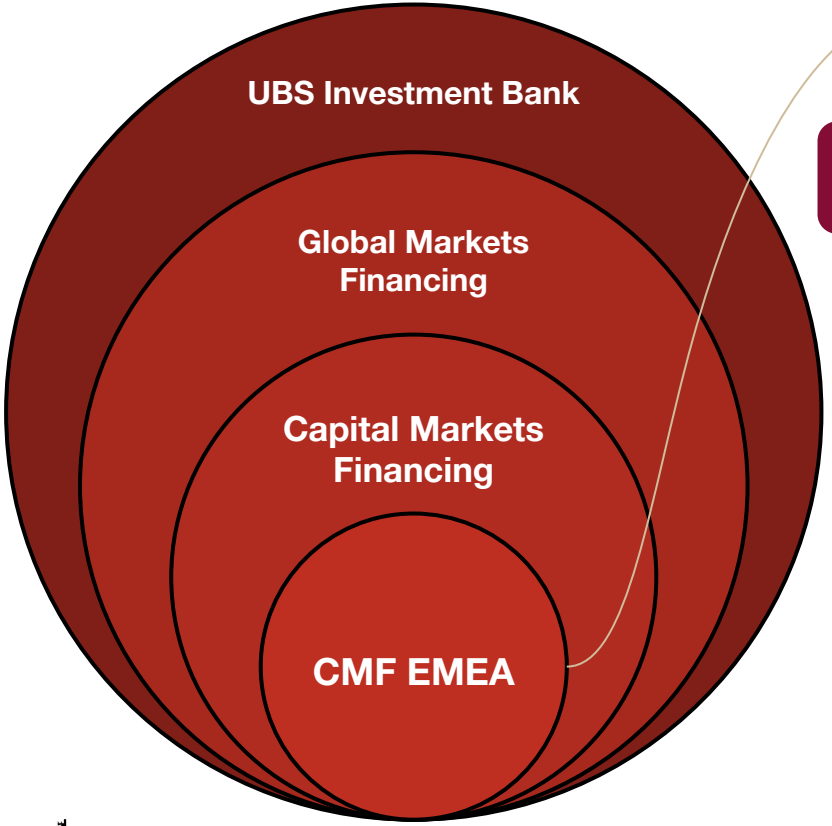
Product Control Intern,
Capital Markets Financing Team (EMEA),

UBS Business Solutions, Hyderabad

8th June 2025

Line Manager : Mrs. Soumya Pandey
Instructor-in- Charge : Dr. Niranjan Swain

Team and Function - What work do we do?



Product Control Team

- P&Ls
- Balance Sheet
- Other Risk Mgmt Processes

MY RESPONSIBILITIES

1. **DAILY PREPROCESSING ACTIVITIES**

2. **DAILY P&L FINALIZATION** for Global TERM Index, and Inventory Management Emerging Markets

3. **Control Checks** to ensure minimise reporting risks.

UBS

Daily Contributions within the Team

Dividend AVI Reconciliation

Dividend AVI (Actual vs Implied) Analysis is used to reconcile the actual cash flows from dividends in the settlement system of the bank against the implied cash flows from the risk management system.

PURPOSE :

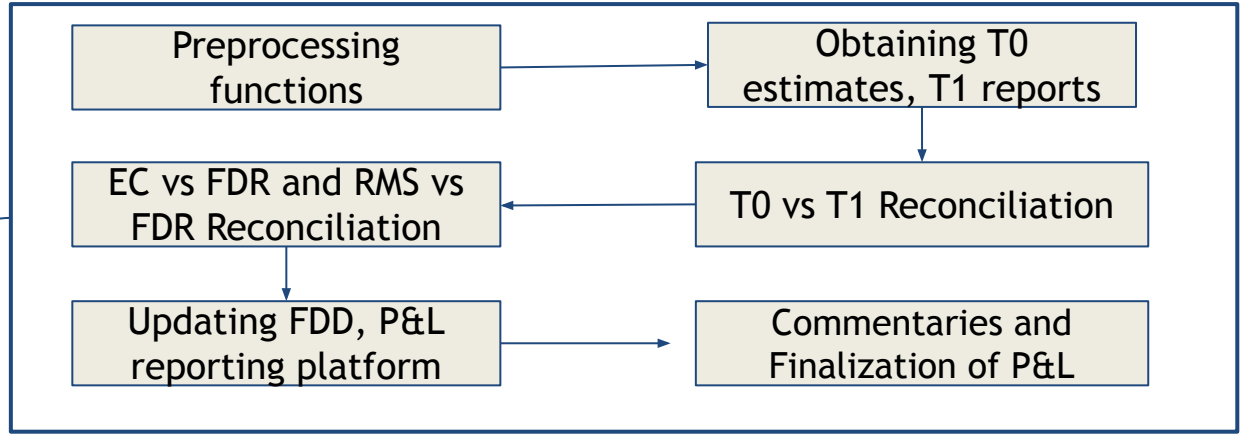
1. To update the ledger and currency holdings with profitable or loss-making differences arising from variance of dividends between the systems.

2. To minimize accounting breaks across systems and manage risks arising from defaulting, fictitious trades, and incorrect trade bookings.

UBS

Daily Contributions within the Team

Daily T0 vs T1 P&L Investigation and Finalization



Identifying the attributes driving the T1 P&L, investigating for any issues in the reporting or flow of data, reviewing the Desk's T0 estimates, and understanding the reasons for variance between T0 vs Financing T1 P&L.

PURPOSE : To make sure that the trading activity complies with the risk mitigation strategies of the company, adheres to regulations and that no rogue trades are carried out.

UBS

Daily Contributions within the Team

Daily T1 vs RSBPL Analysis

Comparing the Mark-To-Market P&L to the Risk-Sensitivity Based (RSB) P&L for the aforementioned books and providing commentaries on variances crossing threshold.

PURPOSE : To ensure the completeness and accuracy of risk sensitivity reporting.

Other Daily Control Checks

Checking for trades crossing thresholds set in place for minimising operational risk.

PURPOSE : To avoid incorrect attributions or to catch rogue trades if any. To ensure completeness of EOD reporting.

UBS

Key Learning Experiences

BOOK-KEEPING PRACTICES WITHIN INVESTMENT BANKS :-

1. *Sub-attribute level understanding of recording the banking P&L statements.*
2. *Standard checks in place to ensure precise reporting, and minimizing risks.*

HIGH-LEVEL UNDERSTANDING OF INTERNAL IB SYSTEMS :-

1. *Front-to-back trade data flow and controls,*
2. *Range of source systems and applications involved in investment banking.*

VALUABLE ORGANIZATIONAL SKILLS :-

1. *Time-management from working in a fast-paced, high-pressure function requiring keen attention to detail.*
2. *Communication skills* from daily constant collaboration with mentors and traders.

THANK YOU

UBS
